

## GREENSORB

### The multipurpose reusable absorbent that's 5x more efficient than crushed clay

➔ View Details . . .

## GREENSORB

- ☑ Absorbs fixed- and rotary-wing aircraft fuel and oil (including Jet-A and Skydrol) spills
- ☑ 50 lb soak up 2.5 gallons of spills compared with just 0.50 gallons with crushed clay
- ☑ 30% larger surface area than crushed clay—cleans faster and costs less per use
- ☑ Even absorbs what crushed clay can't
- ☑ Non-flammable, virtually dust-free and leaves no slippery surface residue behind
- ☑ Costs 15%-18% less (labor, storage, handling, use and disposal) than crushed clay
- ☑ 100% organic
- ☑ Accepted by EPA, USDA, OSHA and DOE

## **GreenSorb absorbs 5x the aviation fuel and oil spills than crushed clay for 15%-18% less**

You need just 50,000 lb of GreenSorb to clean up a year's worth (about 2,600 gallons) of fuel and oil spills.

But you need 5x more (250,000 lb) crushed clay to do the same job.

But crushed clay costs less, right?

Wrong.

When you factor in the labor, storage, handling and disposal costs, crushed clay actually costs \$21,875 more per year.

And because GreenSorb can be used up to 4 or 7 times depending on the viscosity of the oil spilled, downstream waste is reduced by as much as 200,000 lb.

Unlike crushed clay (or even silicate), GreenSorb does not let go of the fuel and oil that it absorbs even after several uses.

The secret behind GreenSorb's superior absorption power and anti-leaching properties is its surface area.

Compared with the surface area of clay, the surface area of GreenSorb is 30% larger.

*See GreenSorb "crush" crushed clay. Play this video and see for yourself!*

In one test, both crushed clay and silicate stained a sheet of copy paper just 15 minutes after absorbing oil. Both materials continued to leach oil even after 24 hours into the experiment.

But GreenSorb didn't.

GreenSorb absorbs and retains fuel and oil faster and better, and does not leave unprotected skin or fingers oily or greasy.

More than that, GreenSorb leaves no slippery surface residue behind.

GreenSorb is a proprietary mixture of earth materials, and is non-flammable, virtually dust-free, at least 100 times safer if inhaled than other absorbents (mainly cat litter-type products), and 100% organic.

GreenSorb is available in 1, 4, 10, 25, 40 and 275 lb packs, bottles, buckets, sacks and drums. You can also place skid quantity orders.
